EDUCATION

National University of Singapore

Aug 2021 - Present

- **Bachelor of Engineering – Computer Engineering** (Expected Graduation: May 2025)
- Highest Distinction (1st Class Honours)
- Dean's List AY22/23 S1
- Google's Developer Student Club (Software Engineer) – Development of a content management system website for Mercy Relief, a worldwide disaster relief NGO using Next.JS, HTML and CSS
- Google's Developer Student Club (Internal Tech Associate) – Conducted a Machine Learning Workshop on Neural Network and CNN for over 50 NUS students and the public on zoom (Using Google Colab & Tensorflow)
- NUS Raffles Hall Residences (RH Developers) - Involved in the development of Hall website and web application that caters to over 400+ residents using ReactJS and CSS technologies

Coursework and Relevant Modules

- EE2026 (Electrical Engineering Digital Design in Verilog) - A+
- CS1010 (Foundational Programming in C)
- CS2040C (Data Structures and Algorithm in C++)
- CG2111A (Raspberry Pi, Arduino UNO, and Lidar SLAM in C++)
- CG1111A (Arduino UNO, Ultrasonic, Colour Sensor in C++)

Millennia Institute – Singapore-Cambridge A-Levels (Science)

Jan 2016 – Jan 2018

- RP: 80/90 ABB/C
- Involved in NUS Suzhou Research Institute Business Overseas Immersion Programme (Start-up Incubator) (Business proposal chosen as most innovative)
- Top 10% of Student Cohort (2016, 2017 and 2018)
- Singapore HDB National Cool Ideas Competition (3rd Place) (Noise Monitoring System Prototype built using Arduino, Programmed with C++)
- West Zone Student's Science Symposium (Won the most innovative award under national pre-university category)
- Participated in National Data Wiz Challenge (Big-Data Analysis)

WORK AND INTERNSHIP EXPERIENCES

Autove Pte Ltd – Project (Software Engineering) Intern

May 2022 – Present

- Full Stack Software Engineering Intern
- Involved in communicating company's business idea and goals with industry partners in Singapore startup launchpad @ One-North during JTC's Tech Fiesta 2022.
- Building of company's proof of concept web app from scratch using Google's Flutter & Firebase technology stack
- Established comprehensive end-user documentation in robot integration, setup, authentication, and deployment of our in-house developed software solution.
- Prepared translated API Documents (Mandarin to English) and communicated with our overseas partner in robot integration and backend support

Safe Distancing Ambassador

Apr 2021 – Jun 2021

- Built/coded a Telegram bot in python (hosted on Google Cloud) which was able to help me to generate easy-to-fill in hourly compliance reports that keeps track of the F&B outlets and wellness spaces compliance and crowd level. This bot greatly improved the accuracy and time taken for my team to write each compliance report.
